- Bio latex

## A Heritage of Innovation in Natural Latex

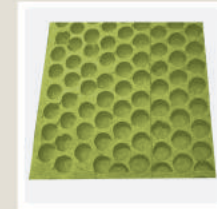

Dunlopillo's reputation as one of the world's best known bedding brands has been built over 70 years though the dedicated production of latex beds, mattresses and pillows to exacting standards. The first Dunlopillo mattresses were made in 1931 and today Dunlopillo latex foam is in high demand for its enduring comfort and support properties along with its luxurious feel. With growing awareness and interest in health, consumers also appreciate latex's natural anti-bacterial and anti-fungal properties, which greatly assist allergy sufferers. The natural properties of latex are well suited to deliver personal rejuvenation and revitalisation.

In 1929, Dunlopillo was the first to invent Dunlopillo latex which is made from 100% natural latex. It proves to be nature's gift for your better and healthier sleep. Today one of the best known bedding brands in the world, Dunlopillo is the authority and leading manufacturer of latex mattresses. Since its invention, Dunlopillo has made natural latex the key ingredient for our supremely comfortable and healthier sleep.

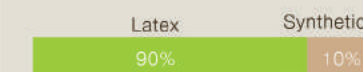

Dunlopillo is premiere brand with a reputation for superior quality and design. Dunlopillo Produces Latex which is more expensive but is considered to be far superior and thus comprises the top end of the bed market.

Dunlopillo has around 27 percent of the Indonesia latex bed market. Dunlopillo also provides beds to 90 percent of Indonesia Hospitals.

### Latex Type

#### Bio Latex Mixture

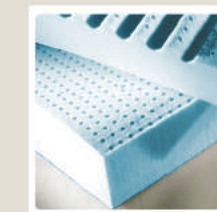

Bio Latex Mattress  
Recommended for those people who prefer to remove all synthetic material from their sleeping area. Soft and supportive, helps relieve pressure points, antimicrobial, resist mold and dust mites.

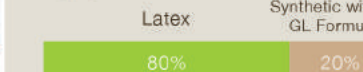

#### Synthetic Latex Mixture

Synthetic Latex Mixture  
Synthetic Latex Mattress  
Offering the consumer a new peace of mind at a cheaper price with more potential for comfort.

#### Latex GL

#### Natural Latex Mixture

Natural Latex Mattress  
Conforms to the contours of the body creating a cushion in which no pressure points are caused during rest. Not only for health and comfort benefits, but also for ability to withstand the test of time.

#### Rebonded Latex Mixture

Rebonded Latex Mixture  
Rebonded Latex Mattress  
The new collection latex provide comfort and value.

Latex GL  
Natural Latex GL Formula  
Offering the consumer a cooler sensation of Latex. Suitable for tropical region.

- Thickness : 18 cm
- Type : Rebonded Latex
- Density : Firm
- Warranty : 10 years

## *The Only Healthy Spring Mattress*

In the history of modern mattress production , only 2 innovations changed the industry. The first in the late 19th century , iron/steel based spring coil mattress was invited. The second in 1930s when rubber-based latex mattress was first introduced into the market as the most comfortable, durable, healthy, safe, and naturally sound mattress to date. Thereafter, all mattress innovation revolved around the improvement of the two existing mattress innovations.

Now, after years of studies and tests performed, the world's third break-through innovation in mattress production has arrived. Created with careful and special attention to Comfort, Ergonomics and Durability, PlasSpring® has been developed to substitute the normal steel-based coil spring commonly used by most Spring Mattress manufactures around the world.

PlasSpring® includes the forth aspects of mattress production : Safety, which has placed PlasSpring® mattress in the same level of quality as latex mattress.

### *Why Choose PlasSpring®?*

PlasSpring® is developed using Thermoplastic elastomer and state-of-the-art architectural technology. As result, PlasSpring® has the strength above regular steel-based spring coil, food-grade level material for safer and healthier choice of material (non-toxic and odor-free), high flexibility and resiliency guarantee long term comfort and durability. PlasSpring® is currently the safest mattress material available. PlasSpring® is also safer for environment since it is 100% recyclable even after 10 to 15 years of usage.

#### *Load Test*

PlasSpring® performance in the Load Test standard of Steel-based spring coil is far above high quality standard with only losing 1.3% of initial height.

#### *Endurance Test*

PlasSpring® outperformed regular Steel-based spring coil by performing at 100.000 cycles (versus 30.000 cycles of standard spring coil) and losing only 6% of it's height compared to initial height. Patent Pending No: P00200900655

- Recommended for : All •
- MultiZone for superb body support while providing freedom of sleeping at any position •
- Advance SideWall for safety while sleeping at the edge of the bed •

## PLASSPRING® COMPARISON TO STEEL-BASED SPRING COIL

Technical tests performed on PlasSpring® have proven that the resilience and flexibility surpassed steel-based spring coil. There 2 most important standard based on EU Quality Standard Tests for Spring-based mattress: Load Tests and Endurance Tests. Load Test determines the strength of the spring capability to support weight. Endurance Test determines the durability of the spring under normal use and how long it will last.

PlasSpring® performance in the Load Test standard of steel-based spring coil is far above high quality standard with only losing 1.3% of initial height. While in Endurance Test, PlasSpring® out performed regular steel-based spring coil by performing at 100.000 cycles (versus 30.000 cycles of standard spring coil) and losing only 6% of it's height compared to initial height.

### HEAVENLY BED

- Thickness : 30 cm •
- Type : PlasSpring with Natural Latex •
- Density : Medium Firm •
- Warranty : 15 years for PlasSpring •
- Recommended for : All •
- Designed for superior balance comfort and support •
- MultiZone •
- Natural Latex Advantages •

### JUVENESCENT BED

- Thickness : 30 cm •

- Density : Firm •
- Warranty : 15 years for PlasSpring •
- Recommended for : All •
- MultiZone for superb body support while providing freedom of sleeping at any position •
- Advance SideWall for safety while sleeping at the edge of the bed •

#### LOAD TEST

PlasSpring® performance in the Load Test standard of Steel-based spring coil is far above high quality standard with only losing 1.3% of initial height.

#### ENDURANCE TEST

PlasSpring® outperformed regular Steel-based spring coil by performing at 100.000 cycles (versus 30.000 cycles of standard spring coil) and losing only 6% of it's height compared to initial height.

Patent Pending No: P00200900655

## The Dunlopillo Heritage

- 1926 - Dunlopillo is registered by its parent company, Dunlop Ltd. three years before Dunlopillo Latex is invented. Dunlop Ltd is renowned worldwide as the inventor of pneumatic tyres, which has since been used in all kind of public transport even aircraft. The Dunlop brand is famous for many products, especially sporting goods such as badminton rackets, golf balls and golf shoes.
- 1929 - Led by Mr E.A. Murphy, Dunlop scientists invent Dunlopillo latex foam. Dunlopillo is the first of its kind to be used to pad seats in public trams, trains and trolleybuses. The aircraft industry welcomes latex foam to pad cockpits and seats as well.
- 1931 - The first latex mattresses are made. It is a huge success as they are the first mattresses that do not need to be plumped, or turned to stay fresh and maintain their shape.
- 1950's - Dunlopillo Latex Seats are installed in the refurbish House of Parliament in the UK.
- 1954 - Dr Theo Lammers from the Institute of Hygiene, Gutenberg University, proves that latex foam has exceptionally high anti-bacterial properties, and is hygienically ideal for mattresses, superior to all existing materials.
- 1955 - Dunlopillo achieves national fame when its latex is used to make a special seat for Donald Campbell's waterspeed record-breaking craft, the Bluebird.
- 1960's - With the installation of a highly advanced manufacturing system to produce Talalay Latex, Dunlopillo UK becomes the world's leading brand of Talalay Latex mattresses.
- 1976 - PT. Dunlopillo Indonesia is established and a new factory was set up in Bekasi, a joint venture between Dunlop Silazenger and local partners. The factory produces latex foam mattresses for the Indonesian and Asian Region market.
- 1987 - Shirley Institute of Manchester reveals that Dunlopillo UK Talalay Latex has twice the ability to kill bed bugs compared to interior spring core mattresses.
- 1990's - Dunlopillo is the first in Singapore to combine nature's perfect utilisation of space, the honeycomb arrangement, with its Individual Pocketed Spring (IPS) System to develop a range of spring mattresses that offers superior support for a better night's sleep.
- 1991 - Dunlopillo is awarded the Queen's Award for export achievement in UK.
- 1995 - Research from the University of Leeds (UK), Department of Microbiology confirms that Dunlopillo UK Talalay Latex is capable of killing 1010 bacteria cells.
- 2001 - PT. Dunlopillo Indonesia is awarded in the ISO 9001-2000 certification for the manufacturing of Latex Mattresses and their related products, the first of such certification to be awarded to a bedding manufacturer in Indonesia.
- 2002 - PT. Dunlopillo Indonesia starts exporting their Latex Mattresses and Latex Pillows to Australia, Japan and Korea.
- 2003 - PT. Dunlopillo Indonesia invented the New BIO - Latex technology for manufacturing Latex, BIO LATEX™ technology produces latex products with instinctive yellow colouring and superior benefits compared to other ordinary latex products.
- 2004 - PT. Dunlopillo Indonesia is the first and the only bedding company awarded the SUPERBRAND certification in Indonesia.
- The Sime Darby Group, thought it's wholly owned subsidiary Dunlopillo Holding Sdn. Bhd., assumes ownership of the Dunlopillo trademark in 45 countries, including Indonesia.
- 2001 - PT. Dunlopillo Indonesia and Sime Darby Berhad conclude a joint venture to set up PT. Sime Dunlopillo Indonesia for the marketing and distribution of Dunlopillo Spring Mattresses in Indonesia.
- 2007 - In celebrating the 30 years anniversary, PT.Dunlopillo Indonesia made a sensational record breaking event : A MURI record longest mattresses in Indonesia with the size of 30m x 2m x 15m. Record was broken 17<sup>th</sup> August 2007.
- As appreciation for the continuous supports from Dunlopillo users in Indonesia, PT. Dunlopillo Indonesia awarded 3 longest Dunlopillo latex mattress users with mattress replacements. The symbolic appreciation awards was given in November 2007 at Jakarta Conventin Center. The winner are Mr. Robert - user of 26 years, Mr. Hadi - user of 26 years, and Mrs. Yenni - user of 24 years.
- 2008 - Broke another MURI (Indonesia Museum of World Record) as the First Gold Plated Spring Bed in the world, the gold plated spring mattress became and acknowledge as the world most expensive mattress.
- Dunlopillo Indonesia proudly support INASleep (Indonesia Sleep Medicine Association) to promote healthy sleep.
- 2009 - Broke the third MURI (Indonesia Museum of World Record) as the First Mattress with Unique Design. The mattress(es) was produced in the form of Indonesia Independence date : 1, 7, 8, 4, and 5 (17 August 1945) which symbolized the Indonesia Independence Day. The mattress showed the users that Dunlopillo latex mattress can be formed as requested while maintaining the quality and comfort for the mattress itself.
- 2010 - Broke the fourth MURI (Indonesia Museum of World Record) as the First mass production mattress with plastic spring (PlasSpring) in the world. Also marked the breakthrough innovation in spring mattress technology with the introduction of PlasSpring, this plastic based spring is environmentally friendlier, safer, and stronger than steel.
- The introduction of Dunlopillo Pillowshop in Indonesia.
- 2011 - PT. Dunlopillo Indonesia and Sime Darby Berhad conclude a joint venture to set up PT. Sime Dunlopillo Indonesia for the marketing and distribution of Dunlopillo spring mattresses in Indonesia.
- The 5th straight year of MURI record with the largest Latex Pillow ever made, measuring 600x400x100 cm and nearly 1000 kg weight.
- The First PlasSpring Mattress Export.
- 2012 - The innovation of Dunlopillo Latex Gel.
- The opening of 2 Dunlopillo Pillowshops : Tang City and Mangga Dua Square.
- 2014 - The innovation of Green Tea Latex Pillow  
The opening of 2 Dunlopillo Pillow shops : Emporium Pluit dan Lotte shopping Avenue.
